Optifos Liquid

Composition (%w/w)

Phosphorus Pentoxide	16.4%
Potassium Oxide	25%

Agronomical Targets

Compatibility

Compatible with other fertilizers, with the exception of Calcium fertilizers. Therefore a separate tank is needed or fertilizers should be applied on different times.

Packaging

Van Iperen Optifos Liquid is a pure and highly concentrated Phosphate product where Phosphate is available as a mixture of different polyphosphates (chains of ortho-phosphates). Our product is a transparent, stable solution and is recommended throughout the growing season. Especially during periods of intensive growth and when the pH in the irrigation system tends to increase. The high level of specific Polyphosphates in our formula increases plant available Phosphate and prevents anorganic pollution of the dripping systems and therewith clogged drippers. Produced in our own plant Euroliquids.

- Keeps irrigation systems clean from anorganic pollution
- Improves root and shoot growth
- Easy to handle and apply
- Developed for fertigation in greenhouses
- Dutch Origin

Product Characteristics

- Highly concentrated solution
- Low on Sodium and Chloride
- Transparent liquid
- Production process certified according to ISO 9001:2015
