ALGAE SOLUTIONS FoliaStim[®] Fe Liquid

Van Iperen FoliaStim[®] Fe Liquid is a pure and highly concentrated liquid Micronutrient fertilizer, formulated with 15% seaweed and EDTA chelates. Our product is a stable solution and is recommended at different phenological stages. The high level of Iron in our formula improves the production of chlorophyll. The presence of high quality seaweed supports the uptake and the transportation of nutrients and increases resistance against abiotic stress. Produced in our own plant Euroliquids.
