Agronomical Targets

Compatibility

Compatible with other fertilizers, with the exception of Calcium fertilizers. Therefore a separate tank is needed or fertilizers should be applied on different times. The pH of the tank solution should be above 4.

Packaging

Iperen 3 - 9 - 0 + Zn Liquid | is a pure and concentrated liquid NPK with a high level of Phosphate. Our product is a stable solution compatible with all Phosphates based straight fertilizers (e.g. MAP, MKP, UP). It is especially suitable during the first half of the crop cycle. Produced in our own plant Euroliquids.

- Improves root and shoot growth with high quality buds
- Developed for fertigation in open field crops

Product Characteristics

- Highly concentrated solution
- Low on Sodium and Chloride
- Black liquid
- Production process certified according to ISO 9001:2015
- Easy to handle and apply

Did you know?

At Van Iperen, we produce over 98.000Mt per year in our production site which is one of the biggest in Europe with a fully automated production line offering high capacity with high flexibility combining mineral nutrition and biostimulation such as our innovative FoliaStim range containing seaweed extract. We use EU high quality raw material only resulting in pure and homogenous liquids. These liquid NPK's are used by growers in over 100 countries worldwide.

Let's make the green switch!

We are Van Iperen International a Dutch producer of Specialty Fertilizers and Biostimulants. We are eager to change the rules of the game in plant nutrition, by providing highly innovative solutions to growers for more sustainable agriculture. Your local Van Iperen Sales Manager will help you and guide you to make the green switch together.
